

## Regional Forums 2023

The Sheep Genetics 2023 Regional Forums will be a great opportunity to network and work collaboratively with your peers and the Sheep Genetics team. The forums will cover a range of topics including how to build better breeding businesses, updates from Sheep Genetics, the upcoming analysis enhancements to be released in May, a demonstration of the new submission's portal, and an interactive question time. This is your opportunity to speak with the Sheep Genetics team and access on-site assistance with your Sheep Genetics questions.

The forums will be held at various locations in NSW, VIC, SA, TAS and WA (TBC). The forums will be held throughout May and June and will run from 9am to 5pm at each location with lunch and refreshments provided. The dates and locations of the 2023 Regional Forums are:

- [Ballarat – Thursday 11<sup>th</sup> of May](#)
- [Adelaide – Thursday 25<sup>th</sup> of May](#)
- [Cowra – Thursday 18<sup>th</sup> of May](#)
- [Launceston – Thursday 1<sup>st</sup> of June](#)

<b>Sheep Genetics Regional Forums 2023</b>	
<b>Boost your Business</b>	This interactive collaborative circle will see peers working together to solve your questions related to ram breeding businesses.
<b>Morning tea 10.15 – 10.45am</b>	
<b>Sheep Genetics Update</b>	Hear the latest and greatest developments of Sheep Genetics and projects including genomics, methane and resource flocks.
<b>Upcoming Analysis Enhancements</b>	Hear the who, what, where, when and why of the 2023 Analysis Enhancements for Sheep Genetics, including parameter updates, and introduction of the new Merino indexes.
<b>Lunch 12.15 – 1.00pm</b>	
<b>Upcoming Analysis Enhancements</b>	Following on with Analysis Enhancements with the Terminals Lambing Ease Updates.
