

Getting started: Key steps

Step one

Contact Sheep Genetics (or a service provider) to join and understand more about what services are best suited to your sheep breeding operation.

Key topics Sheep Genetics staff will discuss include:

- your breeding objective
- what traits you are recording
- basics of the data submission process.

Step two

If you are:

- an Australian breeder wishing to get started with Sheep Genetics, visit sheepgenetics.org.au/getting-started/fees-and-subscription-forms
- an International breeder wishing to get stated with Sheep Genetics, visit sheepgenetics.org.au/getting-started/international-fees-and-subscription
- an existing member and wish to update your listing status, please fill out the web listing form (sheepgenetics.org.au/globalassets/sheep-genetics/resources/web-listing-form-feb-2018-1.pdf) and return to info@sheepgenetics.org.au

Step three

Register for our email newsletter update and search site

- Subscribe to **email newsletter mailing list**: r3.dotdigital-pages.com/p/4PKB-2DM/sheep-genetics-enevs
- Register an account on the **Sheep Genetics search site**: search.sheepgenetics.org.au/account/register

Step four

You are now ready to submit data to Sheep Genetics. For more information, visit the **Data submission process** page: sheepgenetics.org.au/getting-started/data-submission-process
